

**ADDENDUM TO FACT SHEET**  
**Permit No. WA-000179-1**  
**Shell Oil Products US**

This is an addendum to the fact sheet accompanying the draft modification to National Pollutant Discharge Elimination System (NPDES) Waste Discharge Permit No. WA-000179-1, which was issued to Shell Oil Products US on July 8, 2003. The following revisions are proposed.

**PROPOSED PERMIT MODIFICATION**

Zinc Final Effluent Limit: The compliance schedule for the final effluent limit for zinc listed in footnote “c” of Special Condition S1 is proposed to be extended from February 1, 2005 to February 1, 2006.

Acute Toxicity Testing: The testing date for the Acute Toxicity in Special Condition S9 is proposed to be changed from November 1, 2005 to November 1, 2006.

Chronic Toxicity Testing: The testing date for the Chronic Toxicity in Special Condition S10 will be changed from November 1, 2005 to November 1, 2006.

AKART Analysis: The submittal date for the AKART Analysis listed in Special Condition S12.A is proposed to be changed from June 30, 2004 to December 30, 2004.

Engineering Report: The submittal date for the Engineering Report listed in Special Condition S12.B is proposed to be changed from August 31, 2004 to June 30, 2005.

Construction and Startup: The completion date for construction and startup listed in Special Condition S12.C is proposed to be changed from January 30, 2005 to December 31, 2005.

The above-proposed changes are prompted by several significant changes that have occurred at the facility since the issuance of the permit, such as closure of the lubricant facility in December 2003, and completion of the MTCA cleanup by means of excavation of contaminated soils in the main tank farm area between November 2003 and March 2004.

**PUBLIC NOTICES**

The proposed changes to this permit are considered to constitute a major modification under 40 CFR 122.62. Consequently, notice of the draft permit modification is required to be published for a thirty (30)-day public review and comment period. This notice will be published in the *Seattle Times*. The final modification is contingent upon the outcome of the public review and comment period.
